

The DFW Critter Sitter Flea Plan (Simple + Effective)

Simplified Flea Treatment Guide for Pet Owners

Step 1: Knock Them Out FAST

Use Capstar (or generic CapAction)

- Give to all pets at the same time
- Starts killing fleas within 30 minutes
- Use 2–3 doses

This is your immediate relief step.

Step 2: Reset Your Pet + Your Home

This is where most people either win... or restart the cycle.

Bathe Your Pet

- Use a flea shampoo
- Brush before & after

Treat Your Environment

- Spray or flea bombs
- Wash all fabrics
- Vacuum thoroughly

Because: *Most of the flea population lives OFF your pet*

Step 3: Stay Protected (This Is the Game-Changer)

- Monthly preventative (ex: NexGard Plus)
- Treat every pet
- Maintain your home during peak months

Consistency > *is Everything*

Indoor Pets Aren't Safe (Sorry 😓)

Even indoor pets can get fleas because:

- They hitch rides on you
- They enter through other animals
- They settle into carpets and furniture
